

**CARE OF MOULD INSTRUCTIONS
&
MOULD GUARANTEE**

Your Moose Mould has been custom made to your specifications. Please take the time to look it over and observe the quality and workmanship that went into its creation! If upon receipt, you are not completely satisfied, please contact me and I will respond accordingly.

To ensure the best performance and longevity of your mould, proper care and use is recommended. You will notice a thin coating of lubricant on your mould. Prior to first use, remove this coating with a degreaser or alcohol. Be sure to dry your mould thoroughly. After degreasing your mould, apply a thin coating of **MOOSE JUICE™** Mould Prep (*a specifically formulated graphite lubricant*) to your mould, make sure to also lube all moving parts (pins, screws, etc.) to help prevent galling. Always apply your **MOOSE JUICE™** to a dry, oil-free, cold mould.

When your casting is completed and the mould has cooled completely, clean your mould with degreaser or alcohol and when completely dry, re-apply your **MOOSE JUICE™** to prevent rusting while stored and not in use. When ready to recast, re-apply **MOOSE JUICE™** as stated above.

Following these care instructions will ensure that your mould will last, and will assure that the **Moose Moulds Guarantee** remains in effect as stated below:

The workmanship and quality of your mould is 100% guaranteed for one (1) year from the date of purchase. Moose Moulds Guarantee does not include any misuse and/or abuse of your mould. If for any reason your mould does not perform the way it should, contact me for repair or replacement of your mould.

Moose Moulds are tested and designed to cast bullets using pure - soft lead melted between 820-850 degrees to obtain proper bullet dimensions. Difference in lead temperature and type of lead may affect bullet diameter.

Moose Moulds is always happy to hear from customers; please provide any thoughts or feedback. Customer satisfaction is the #1 goal. Customer input or comments regarding their Moose Mould will help maintain this goal.
